

FIRE SAFETY CONSULTANTS, INC.

About FSCI

Fire Safety Consultants, Inc. (FSCI) was formed in 1983 as a firm of fire protection specialists dedicated to providing the highest quality, code based fire protection plan review services. In 2004, FSCI merged with Britt-Moore Associates allowing us to specialize in building code consulting and we also opened our first regional office in Pleasant Ridge, Michigan. In 2007, we moved into our current Corporate Offices location in Elgin, Illinois. More currently, in September, 2017, FSCI was acquired by Paramedic Services of Illinois (PSI), and operates independently as division of PSI. As always, we strive to serve our clients with integrity and professionalism. Currently, we are one of the largest private plan review service companies in the United States and are proud to have an extensive list of long standing clients who have chosen Fire Safety Consultants, Inc. to provide their plan review services.

Participation in the code development process gives our staff an intimate knowledge and understanding of many codes and standards. FSCI principals and senior consultants are involved in the code development process at both the national and state level. Some of these committees include NFPA 3, NFPA 4, NFPA 13, NFPA 24, NFPA 72, NFPA 101, NFPA 291, NFPA 1201/1250, NFPA 5000, and the ICC International Fire Code.

FSCI specializes in fire protection disciplines, but as we grew, our clients requested more services. We expanded services to include seminar presentations, consulting services to private industries, and building and life safety plan review services.

Our company offers a full range of building, fire, and life safety plan review and inspections, consulting, and education and seminars.

- One set fee charged for all plan reviews per discipline
- Turnaround time kept to less than 10 business days under normal circumstances
- Expedited services are available
- Free project meetings or conference calls for all plan reviews
- Consultants that are readily available to answer any code or project specific questions
- Inspections performed within 72 hours of being requested under normal circumstances
- Subject matter expert research and testimony is available

Private training for your staff or organization including building, fire, and life safety code related topics and many referenced standards is available.
